

YOUR TRUSTED SECURITY PARTNER

SECURE, COMPLY, GROW: ACCELERATE YOUR FINTECH INNOVATION

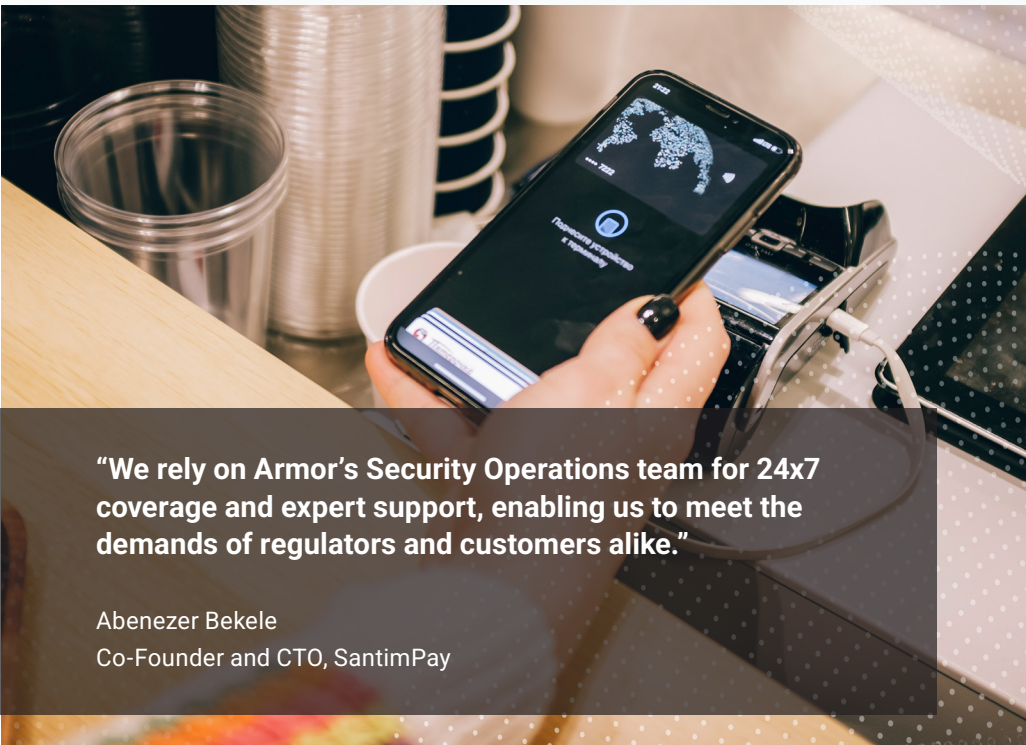

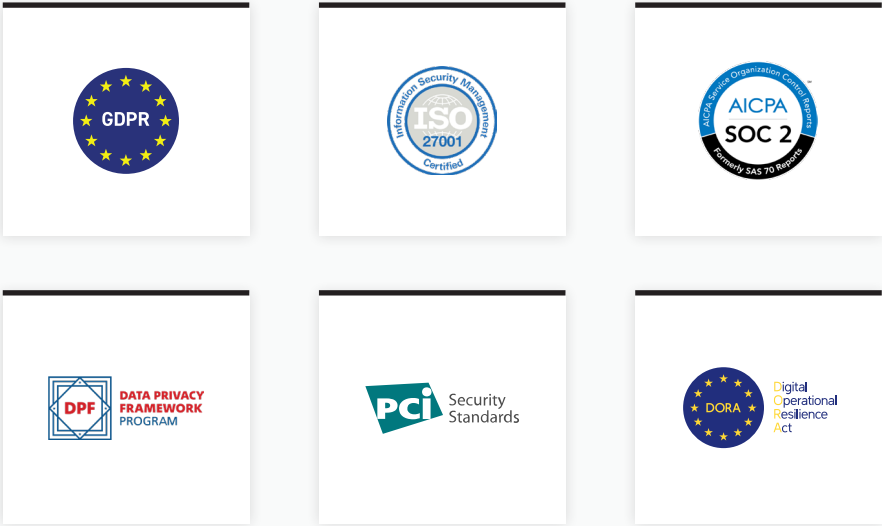

Armor is the trusted security partner for **FinTech SaaS companies** – empowering them to earn customer trust, safeguard financial data and systems, meet stringent compliance requirements, and ignite innovation in today’s high-stakes financial ecosystem.

Why Armor for Your FinTech SaaS Company?

Powering the future of finance with technology, FinTech SaaS companies bear intense security expectations. With sensitive customer financial data at stake, strict regulations, new compliance frameworks, and rising breach risks, cybersecurity is no longer just a compliance obligation – it’s a critical enabler of business success.

Over 40% of insurance claims from FinTech firms are cyber-related – up to 8x higher than some traditional financial institutions.¹ If your product handles PII, payments, or transaction data – **you are part of your customers’ risk profile.**

“We rely on Armor’s Security Operations team for 24x7 coverage and expert support, enabling us to meet the demands of regulators and customers alike.”

Abenezer Bekele
Co-Founder and CTO, SantimPay

PAYING IT FORWARD

Armor Helps You Become Their Trusted Partner

We combine advanced threat prevention, real-time monitoring with 24x7 SOC response, and deep compliance expertise. With 600+ mapped controls, you can securely accelerate cloud migration and compliance timelines by up to 80%.²

Your team stays focused on building transformative financial technologies. Your customers gain confidence that your environment is professionally secured and continuously monitored.

TRUSTED BY LEADING FINTECH INNOVATORS WORLDWIDE

From payments, insurance, lending and AI-driven financial platforms, Armor protects forward-thinking FinTech companies who need to move fast – securely:
