

ReconArt Empowers Global Finance

High Performant, Compliant, Secure.

*In a world where a single missed transaction can have profound financial or regulatory implications, enterprises turn to ReconArt. **Powered by Armor's security and Oracle's performance, ReconArt ensures every transaction is trusted, every audit is simplified, and every growth opportunity is secure.***

Enterprises face relentless pressure to uphold financial controls, safeguard financial data, prove compliance, and scale without disruption. To meet these demands, global brands such as Expedia, Daikin, BMO, and Klar rely on ReconArt's enterprise-class data matching and account reconciliation platform. From financial services to retail, to travel and e-commerce, **ReconArt delivers data accuracy and compliance across stringent regulations and frameworks**, including PCI-DSS, SOC 2, ISO 27001, GDPR, and DORA.

CHALLENGES

Ironclad security

In 2011, ReconArt embarked on a journey to develop a modern, SaaS-based platform for data matching and account reconciliation. The team **needed a highly secure cloud** to safeguard the company's unique applications, protecting its competitive edge.

Increased regulation

Financial institutions and enterprises continually face new privacy and security regulations and compliance frameworks. ReconArt and its customers **needed to reduce their audit resources and streamline compliance processes**.

Explosive customer growth

ReconArt's customer base grew massively, and transaction volumes surged from **50,000 to more than 30 million per day for some customers**. This increase in demand required new high-performance compute and storage infrastructure.

SOLUTIONS

Always-on protection

ReconArt selected the **Armor Enterprise Cloud (AEC) with 24x7 SOC coverage and new agentic AI threat response, providing a 15-year no-breach record**. Ongoing penetration testing by ReconArt customers demonstrates Armor's proactive, comprehensive security capabilities.

Audit speed and simplicity

ReconArt and its customers inherit and carve out controls from **Armor's 600+ mapped controls**, reducing the resources and time required to meet certifications and regulations, such as PCI-DSS, ISO 27001, SOC 2, GDPR, and DORA.

Performance at scale

With its mission-critical workloads migrated to Oracle Cloud Infrastructure (OCI), **ReconArt gained six times more Input/Output Operations Per Second (IOPS) performance headroom**—delivering speed and accuracy even at massive transaction volumes.

“

ReconArt has been an Armor customer for over 15 years. Armor Enterprise Cloud, hosted on OCI, supports hundreds of ReconArt customers, some with over 30 million transactions processed daily. Armor's 24x7 security operations, proactive threat intelligence, and over 600 controls, combined with OCI performance, give us peace of mind that our data is secure, while meeting the speed and strict compliance requirements our customers' demand.

Ivan Popov, CTO
ReconArt

RESULTS

30M+ ↑

From 50K to 30M+ transactions daily—without sacrificing accuracy or uptime.

70% ↑

faster time to compliance via Armor's 600+ mapped controls.

6X ↑

storage performance headroom ensures capacity for tomorrow's customer needs.

NEXT STEPS

ReconArt is developing System Control, a new enterprise-grade application designed to monitor and audit critical business transactions across complex, multi-system environments. For customers, this means proactive visibility, reduced risk, and operational excellence at extreme scale. With Armor and Oracle providing the foundation, customers can trust that ReconArt's System Control will deliver both performance and security without compromise.

ABOUT ARMOR

Armor, a global cybersecurity leader, provides comprehensive managed detection and response (MDR) and compliant cloud solutions. By combining advanced technology with expert services, Armor protects businesses from cyber threats, mitigates their risk, and ensures regulatory compliance. Dedicated to innovation and excellence, Armor is trusted by thousands of customers worldwide.

The company is headquartered in Dallas, Texas, and has offices in the United States and Singapore.
